

Joanne Atkinson
Rayjon, Canada

First I want to thank God for having allowed us to work together for the same purpose, to be a blessing for people of Rabinal and their communities.

For more than one year I have been working and supporting the clinic for malnourished children. In this place I have lived and experienced the true love of God even these children's have suffered and been abused physically, mental, verbal psychological. Through all these problems is a helping hand they have found in our clinic.

The idea to make of the eye glass clinic in this region was because is too much poverty and is considered a place forgotten by their access and little support from local government but I think each person in the team experienced the warmth of the people, their hospitality and traditions, although governments have considered our country as a threat to visit. I think the experience that each one of you experienced was the opposite of what the news says.

Something very important is that behind this activity there was a group of people that their contribution was to pray day and night that everything would go smoothly and that those most in need could have this benefit.

Once again I want to thank Joanne Atkinson and her team work and also people who work alongside her and that every detail was taken care and we can consider that this clinic was a great success.

I also want to thank every single person who had the confidence to travel to Guatemala and be part of this great team and it was not easy to work and to cover travel expenses, this was an investment that God will reward you in all you do.

For the local team in Guatemala was a great experience having worked and hopefully in the future not too distant future we can have another great experience.

Thank you and may Almighty God bless your lives

My best regards
